

All Natural - Bioavailable - Low Sodium

Concentrated pH Balancing Formula†

Tcentials®

Trace Mineral Drops
Full Spectrum of Ionic Trace Minerals

Tcentials® Low Sodium Trace Mineral Drops contains 72 naturally occurring ionic trace minerals extracted from the Great Salt Lake in Utah, with 99% of sodium removed, to restore a healthy mineral balance and promote optimal health.†

In balanced, trace amounts, minerals are vital to the proper functioning of the body's systems. Many diets today are deficient in essential minerals, leaving you feeling fatigued or suffering from food cravings and muscle cramps.†

By providing all-natural, bioavailable trace minerals, Tcentials® replenishes vital nutrients and balances pH levels in the body for increased energy and vitality, so you can feel your best!†

This product contains over 72 naturally occurring ionic trace minerals in varying trace amounts as found in sea water, including those listed as well as the following: Calcium, Silicon, Selenium, Phosphorus, Iodine, Chromium, Manganese, Iron, Copper, Molybdenum, Zinc, Vanadium.

Certified Vegan. Gluten Free.

Potassium	3 mg	**	<1%
Sulfate	40 mg	**	**
Lithium	1.5 mg	**	**
Boron	1 mg	**	**

**Daily Value (DV) not established.

Ingredients: Ionic sea minerals from the Great Salt Lake in Utah, USA. Contains no other added ingredients.

Allergen Information: Contains no known allergens.

Suggested Use: This product is all natural, highly concentrated, contains no added preservatives, flavors, or sweeteners and has a very strong taste.

We recommend mixing it with juice or food and dividing the serving throughout the day to mask the concentrated mineral flavor. Begin regimen by taking 10 drops for 3 consecutive days. Each day thereafter, increase serving by 10 drops up to 1/2 teaspoon (40 drops) once or twice daily.

Children age 2-3: Take 1 drop for every 5 lbs of body weight. For regular or sodium restricted diets.

Re-mineralize Water: Improve the flavor of distilled, reverse osmosis or purified water. Adding 20-40 drops per gallon or to taste (2-4 drops per glass) compares to an expensive mineral water.

Minor crystallization may occur, but this does not affect the quality of the product.
