

Vitamin E and selenium are natural antioxidants that work together to provide superior cellular protection.[†] Research shows that natural vitamin E is more bioavailable to the body than synthetic sources. Our **Vitamin E with Selenium** contains all natural, unesterified d-alpha tocopherol in a base of mixed tocopherols, including d-beta, d-gamma, and d-delta. Organic selenium works synergistically with vitamin E to protect cell membranes.[†] Lecithin is added to the formula to provide a natural source of phosphatidylcholine, phosphatidylinositol, and phosphatidylethanolamine. Lecithin also helps to emulsify vitamin E, making it easier to digest. This product contains natural ingredients, which may result in color variation from batch to batch.

STORE IN A COOL, DRY PLACE

Most soy allergies are actually allergies to soy protein. Our **Vitamin E** is derived from soybean oil that does not contain soy protein.
