THE BENEFITS OF ULTRA AMINO COMPLEX

GNC Pro Performance® Ultra Amino Complex has been developed by GNC scientists and leading exercise and sport nutrition experts to provide hard-working muscles the specific fuel they need to protect against muscle breakdown, fuel recovery and boost muscle protein synthesis.* Best of all, it tastes absolutely refreshing!

GNC Pro Performance® Ultra Amino Complex supplies a research-approved mega-dose of purified and ultra-concentrated fast-absorbing BCAA to help drive muscle protein synthesis. The BCAA found in the GNC Pro Performance® Ultra Amino Complex are rapidly absorbed by hard-working muscles and drive results!*

GNC Pro Performance® Ultra Amino Complex also supplies a high dose of free-form, fast-absorbing essential amino acids for total body results. This formula helps increase nitric oxide production for muscle pumps, helps your muscles recover and helps prevent the muscle breakdown that can occur with intense exercise.*

NITRO-FACTOR™ – MAXIMIZE MUSCLE BUILDING†

The full muscle building potential of a GNC product is based on its total nitrogen content – so the more nitrogen a product has, the stronger it will perform. Pro Performance® Ultra Amino Complex with a Nitro-Factor™ of 8 grams helps fuel performance and anabolism.*

*When used in conjunction with an exercise program.
