

White willow bark naturally contains multiple pain inhibiting factors, including salicin and bioflavonoids. Salicin is more gentle on the stomach than other pain relief products. Approximately 1 gram of white willow bark is needed to provide 240 mg of Salicin. The 240 mg of salicin found in **Salizain™** is the amount used in research trials that have demonstrated a benefit for pain.[†]

WARNING: White willow should be avoided by individuals who are allergic to aspirin or its derivatives. It should also be avoided by those with kidney or liver conditions, asthma, stomach ulcers, inflammatory bowel disease and breast feeding mothers.
