

Magnesium is a poly-active major essential mineral. Magnesium helps to regulate calcium transport and absorption. By stimulating the secretion of the hormone calcitonin, it aids the influx of calcium into bone and promotes optimal bone mineralization. Magnesium also works with ATP to release the energy needed to fuel most reactions in the body. It supports healthy nerve and muscle function. This formulation provides a patented form of chelated magnesium to help support optimal absorption and assimilation.*

This product contains a chemical known to the State of California to cause birth defects or other reproductive harm.

Carefully Manufactured by:
Solgar, Inc.
500 Willow Tree Road
