stability of probiotics, such as heat, moisture, and oxygen.\*

ProbioMax<sup>®</sup> ENT for Kids is a chewable, strawberry-flavored probiotic that activates in the oral cavity for support of ear, nose, and throat health and to naturally promote fresh breath. As you chew, ProbioMax ENT for Kids releases the ENT-12<sup>™</sup> strain of *Streptococcus salivarius*, a beneficial bacterium that normally occurs in a healthy oral cavity. *S. salivarius* adheres to cells in the cavity and positively affects the bacterial population and natural immune defenses therein. Once established, *S. salivarius* ENT-12 also naturally counteracts the production of volatile sulfur compounds that can cause bad breath. Tablets are individually sealed in nitrogen-purged aluminum blister packs, which serve as protection from factors proven to compromise the stability of probiotics, such as heat, moisture, and oxygen.\*

consult their healthcare practitioner prior to use. Do not use if foil is punctured. Not recommended for children aged 4 or younger without the direct recommendation and supervision of a healthcare practitioner. This product should be administered by an adult. Pregnant or lactating women should as directed by your healthcare professional.

**DIRECTIONS:** As a maintenance dose, after your bedtime oral hygiene routine increased need, chew up to five tablets per day in divided dose for 90 days, or as directed by your healthcare professional.
