

Glucosamine, Chondroitin, and MSM are three popular ingredients that are combined to provide comprehensive joint support. Our glucosamine complex provides a special blend of three sources of glucosamine, including glucosamine sulfate, n-acetyl d-glucosamine, and glucosamine hydrochloride.†

Glucosamine is a building block of joint tissue, and helps the body manufacture substances necessary for healthy joints. Chondroitin is a natural extract from beef cartilage and helps fight the breakdown of tissue and cartilage in the body. MSM provides naturally occurring organic sulfur, which is a necessary component for making collagen, a primary constituent of joints, cartilage and other connective tissues. Used in combination, our **Glucosamine Chondroitin MSM** formula provides a convenient supplement to support healthy joints.†

OptiMSM® is a registered trademark of Cardinal Associates, Inc.
