

SUGGESTED USAGE: Take 1 softgel 1 to 3 times daily with food, or as directed by your healthcare practitioner.

HOW IT WORKS: Phosphatidyl Serine is a phospholipid compound derived from soy lecithin that plays an essential role in cell membrane composition, conduction of electrical impulses, and intercellular communication.* As a major structural component of neural membranes, Phosphatidyl Serine facilitates the activity of neurotransmitters involved in learning, memory, and mood.* *Ginkgo biloba* possesses powerful free radical scavenging properties and research suggests that it may promote healthy vascular function.* These properties make Phosphatidyl Serine & *Ginkgo biloba* an ideal supplement combination for cognitive support.*

CAUTIONS/INTERACTIONS: Do not use if you are pregnant or nursing. Phosphatidyl Serine may interact with acetylcholinesterase inhibitors, cholinergic or anticholinergic medications. Ginkgo may interact with anticoagulants and antiplatelet medications, anticonvulsants, and antidepressants. If you are taking any prescribed medications, planning to have surgery, or if you have liver disease, or coagulation disorder, consult your healthcare practitioner before taking this product.
