Smart Facts

Sundown Naturals® Gluten-Free Probiotic Gummies are the great-tasting way to get friendly bacteria for your digestive system.* Made with natural flavors, Probiotic Gummies feature a special probiotic strain called *Bacillus coagulans* Unique IS-2™. This strain is naturally found in the intestinal microflora, and surrounds itself with protective layers to increase its viability — many typical probiotic bacteria do not have these protective layers. That's why *Bacillus coagulans* Unique IS-2™ can survive the high temperatures of the gummy processing environment better than many typical probiotic bacteria, plus it can survive extremes of pH as found in your digestive tract so you can get the friendly microorganisms your digestive system deserves.*
