Joint Lubricating Formula
with Glucosamine†

GLUCOFLEX™

**Hyaluronic
Acid**

Advanced
Joint Lubricating Formula
with Glucosamine†

Glucoflex™ advanced Hyaluronic Acid formula with glucosamine is the state of the art joint lubricating formula which helps to rehydrate damaged and depleted joints and connective tissue, helping to replenish moisture, comfort, and range of motion. Glucoflex™ Hyaluronic Acid formula with Glucosamine supplies the most bioavailable form of HA (Hyaluronic Acid) for the most direct delivery of this amazing nutrient. HA has been used for more than 25 years to help replenish moisture after joint surgery and when cartilage is removed. HA is the universal moisture nutrient and lubricant the body uses to keep it hydrated and replenish vital fluids including joints, cartilage and connective tissue. HA holds over 150 times its weight in water and can help to ease tightened, stressed joints.

Glucosamine is a natural compound that nutritionally supports the body's ability to regenerate and rebuild cartilage and connective tissue.

Glucoflex™ HA is the first nutritional formula that uniquely combines the lubricating and shock absorbing properties of Hyaluronic Acid with the research proven benefits of Glucosamine for maximum joint support, repair and flexibility.

Supplement Facts

Serving Size: 1 tablet		Servings Per Container: 30
	Amount Per Serving
