

**EVOLVE. VERB 1. TO EMERGE IMPROVED
OR MORE ADVANCED THAN BEFORE**

TROXYPHEN® EVOLVE contains critical ingredients, which help you train harder, exert yourself for longer periods of time and be ready for the next round quicker than ever. **TROXYPHEN® EVOLVE** is the foundation of a supplementation program with which you can build a truly solid physique.

PERFORMANCE TIPS: TROXYPHEN EVOLVE can be taken anytime before, during or after intense physical activity. Mix EVOLVE with your preferred water amount to achieve desired flavor strength.
MAXIMUM RESULTS: Stack EVOLVE with TROXYPHEN ENGAGE (Pre-Workout Activator) and TROXYPHEN ELITE (T-Boosting & Growth Enhancing Capsules)

KEEP AWAY FROM CHILDREN. STORE IN A COOL DRY PLACE.

TROXYPHEN

EVOLVE

INTRA / POST CATALYST

INGREDIENTS SHOWN TO HELP:

2:1:1 BCAA'S
L-Leucine, L-Isoleucine L-Valine

INCREASED MUSCLE
Growth & Working Capacity*

RECOVER & REPAIR FASTER
Replenish ATP & Reduce Fatigue*

3500MG
D-RIBOSE

3000MG
AMINOBLAST®

2000MG
CARNO SYN®

DIETARY SUPPLEMENT | 300 GRAMS | 30 SERVINGS

BioEnergy Ribose® amplifies the body's natural process of energy synthesis. It helps reduce the loss of energy and accelerates tissue and energy recovery. Ribose supplementation administered orally works to restore cellular energy lost during training and is a much more effective method of recovery.

CarnoSyn® (beta-alanine) delivers increased muscle working capacity, improved muscle endurance and delayed muscle fatigue during workout. Beta-alanine is a non-essential amino acid that binds to histidine to form muscle carnosine.* Carnosine buffers, or neutralizes, the hydronium ions that lead to muscle fatigue and failure.*

AminoBlast® is composed of L-Leucine, L-Isoleucine and L-Valine in the perfect 2:1:1 ratio. Most athletes are aware of the critical role of BCAA's in muscle development and recovery, however not all BCAA's are created equal.

EVOLVE also contains a blend of calcium, magnesium and potassium that deliver what tired muscles are desperately searching for. This shot of key nutrients helps ensure that your body makes a rapid recovery and is ready to tackle your next training session in top form, helps prevent muscle breakdown during rigorous exercise and helps activate mTOR protein to build skeletal muscle.*

SUGGESTED USE: Mix one scoop into 6-8 oz. of cold water and consume during or after physical activity.

TRAINING DAYS: Consume one serving during training and finish within 30 minutes of completion of activity.

NON-TRAINING DAYS: Consume one serving over the course of the day.

MANUFACTURED IN A FACILITY THAT PROCESSES MILK, SOY, EGGS, NUTS AND WHEAT.
