

Suggested Use: As a dietary supplement, take one serving (1 scoop) mixed with 8-16 ounces of water or suitable beverage. Taken 1-2 times daily, once in the morning and again as a pre-workout (optional). Cycling on and off with training and resting days may provide optimal results when used. Do not exceed 4 servings in one day.

Agmatine is a byproduct of Arginine that is produced through a process called decarboxylation. Agmatine is thought to act as a neurotransmitter, a chemical that modulates the activity of cells in your brain, and is also an intermediate product in the synthesis of polyamines, an important chemical for cell growth. Agmatine can also help regulate the production of NO from arginine by inhibiting enzyme synthetase in the body. The uptake of agmatine effects arginine in NO synthesis and blood vessel dilation which is usually limited naturally by your body.*

PART# 80055-25011 VER. 2.0 REV 07.30.2015

**AGMATINE
SULFATE**

600mg PER SERVING

100% PURE POWDER

- PROMOTES MUSCLE CELL GROWTH[†]
