

Suggested Use: As a dietary supplement, take one serving (750mg) with 8-16 ounces of water or suitable beverage. Taken 1-3 times daily for best use. Optimal dosage may vary for each individual; consult with your qualified health professional to see if a higher dose is right for you.

Bioenergy Ribose® D-Ribose is a unique 5 carbon carbohydrate that can be used as a standalone product or added to a variety of functional foods, beverages, and nutraceuticals. It is natural, safe and clinically proven.†

Ribose is the vital structural backbone of critical cellular compounds called purines and pyrimidines. Our bodies must have an adequate supply of purines and pyrimidines to form major cellular constituents such as our genetic material (DNA and RNA), numerous cofactors and certain vitamins. But more importantly, ribose is the backbone of adenosine triphosphate (ATP)—the source for all cellular energy. Ribose is the starting point and the rate limiting compound in the synthesis of these fundamental cellular compounds and the availability of ribose determines the rate at which they can be made by our cells and tissues.†

Bioenergy Ribose is unique in this metabolic role. No other compound can replace ribose in the important job of regulating the metabolic processes involved in synthesizing purines and pyrimidines. And without these vital structural components, our bodies would quickly run out of energy, could not make proteins and our cells would lose the ability to replicate. Energy recovery and tissue repair are slower in heart and muscle cells, especially after overwork or exercise. Ribose drives the process that replenishes ATP and other energy components in these cells.†

PART# 83025-25011 VER. 2.0 REV.07.22.2015

D-RIBOSE

750mg PER SERVING

Presented by
BIOENERGY RIBOSE

- OPTIMIZED ATP PRODUCTION FOR CELLULAR ENERGY†
- METABOLIC REGULATING OF PURINES & PYRIMIDINES†
- SUPPORTS MUSCLE ENERGY, ENDURANCE, & REPAIR†

UNFLAVORED
