

Suggested Use: As a dietary supplement, take one serving (3 scoops) 1-2 times daily with 16 ounces of water or suitable beverage. Take once in the morning on an empty stomach and/or again one hour prior to workout for best results.

L-Arginine is a versatile amino acid serving as a precursor for the manufacturing of proteins, nitric oxide, urea, glutamate, and creatine in the body. Increased L-Arginine in the body may lead to an increase of Nitric Oxide (NO) production, which may also increase blood flow during exercise, allowing for muscles to perform longer under stress. The vasodilation effect of Nitric Oxide may provide a fuller and more satisfying pump during exercise.[†]

Nitric Oxide (NO) production puts the urea cycle into overdrive, allowing it to absorb more ammonia (composed of nitrogen molecules) produced by working muscles. Removal of ammonia from the brain is believed to have detoxification and neuroprotective qualities.[†]

PART# 82880-2501T VER. 2.0 REV. 07.29.2015

L-ARGININE

3000mg PER SERVING

100% PURE POWDER

- SUPPORTS MUSCLE PROTEIN SYNTHESIS[†]
- PROMOTES NITRIC OXIDE (NO) PRODUCTION[†]
- IMPROVED MUSCLE RECOVERY AND REDUCED FATIGUE[†]
