THE DIGEST SMART™ DIFFERENCE

Potent Digestion Power for Each Food Group

The digestive potency of enzymes is measured by **Enzyme Activity Values (EAV)**. An enzyme's EAV measures how effective the enzyme is in converting the major food groups—protein, carbohydrates, fat, and fiber—into smaller absorbable nutrients to provide the nourishment and energy your body requires.

Digest Smart is made with a potent, full-spectrum blend of 25 enzymes to address all major food groups, and is the first digestive enzyme product to use independent, validated testing by the **IZYME Program™** to identify total enzyme activity for each major food group:

SENIOR CARE POTENCY

Food Group	EAV Power
Protein	2,000,000 PU
Carbohydrate	40,000 DP
Fat	4,900 FIP
Fiber	4,200 CU

The high potency Enzyme Activity Value for each group is your assurance that Digest Smart will help support more complete breakdown of the major food groups, optimize nutrient availability and ease digestive discomfort from today's complex diets.*

Targeted Delivery Capsules

Digest Smart features ZymeGUARD™ targeted-delivery capsules to shield the enzymes from stomach acid and ensure delivery to the intestines where 90% of digestion occurs.*

Potency & Purity Guaranteed

Digest Smart is third-party tested and certified for potency and purity. For test results, visit www.izyme.com.

WHY TAKE DIGEST SMART™ SENIOR CARE?

Many foods today do not contain active enzymes to aid in the digestive process, causing problems like occasional gas and bloating. Age, poor diet, inadequate chewing and stress can also contribute to occasional digestive upsets.

Digest Smart is made with a full spectrum of 25 raw, plant-based enzymes to support more complete breakdown of all major food groups.* Taken with every meal, it can help ease occasional digestive upsets, optimize nutrient availability, and support digestive health and normal energy levels.*

Digest Smart Senior Care includes additional herbs and trace minerals to support the digestive needs of Adults 50+ and help:

- Optimize enzyme production lost with age*
- Stimulate more complete digestion of fats*
- Optimize nutrient availability*
- Prevent occasional gas and bloating*
