

Chanca Piedra, 500 Mg/ 90 Caps [3011]

Product Description:

Nutritional supplement made from Chanca Piedra, or Break-Stone, specially formulated to help prevent and/or remove kidney stones and gallstones, protect the liver, strengthen the immune system, lower blood pressure and high cholesterol levels, and relieve pain.

Nutritional Information:

This plant is popularly regarded as a miracle herb for the variety of healing properties attributed to it. Chanca Piedra's composition is a large amount of phytochemicals, which give it a high potential as a regulator of many of the functions of different organs of the body; it also contains alkaloids that allow you to balance the pH of body fluids, which is essential for proper cell functioning.

Alternative medicine attributes Chaca Piedra with the following properties:

- It dissolves oxalate crystals, especially calcium and magnesium crystals, but it is also an effective diuretic and aids in relaxing the muscles in the urinary tract, which facilitates the expulsion of the crystal build-up in the urine.

- It serves as a natural protector of the liver, effective against hepatitis and jaundice, and an anticancer agent in cases of liver cancer.

- It strengthens the immune and lymphatic systems helping to fight off viruses and infections.

- Lowers high blood pressure, thereby protecting the heart and circulatory system.

- It is a powerful analgesic, 7 times more potent than aspirin and acetaminophen, without the side effects of chemical analgesics.

- It has antiulcer properties and helps protect the stomach membrane.

Suggested Use:

Adults take 2 to 3 capsules daily or as directed by your healthcare professional.

Precautions:

Discontinue use if adverse symptoms arise.

Ask your health care advisor regarding the use of herbs during pregnancy, for children or in combination with pharmaceutical drugs. Keep out of reach of children.

Warning:

The statements contained herein have not been evaluated by the Food and Drug Administration (FDA). These products are not intended to diagnose, treat and cure or prevent disease. Always check with your professional health care provider before changing any medication.
