

SUGGESTED USAGE: Take 2 tablets daily with food, or as directed by your healthcare practitioner.

HOW IT WORKS: Magnesium is a mineral that is essential for a wide range of fundamental cellular functions as it is a cofactor in at least 300 different enzymatic reactions.* Magnesium is well known for its roles in healthy cardiovascular function and bone formation and mineralization.* It is also critical for the regulation of muscle contraction and nerve conductivity through its influence on cell membrane permeability, as well as on the maintenance of the proper charge balance of the bodily fluids.* In addition, Magnesium is essential for the production of cellular energy from the metabolism of carbohydrate and fat.*

CAUTIONS/INTERACTIONS: Large doses of oral magnesium may have a laxative effect. Magnesium may interact with some antibiotics, diuretics, bisphosphonates, and muscle relaxants. In addition, many medications can affect magnesium absorption and excretion. If you are taking prescription medications, consult your healthcare practitioner before using this product.
