

Maitake (*Grifola frondosa*) has been prized in traditional Japanese herbology for hundreds of years. Modern science has identified in Maitake a proteoglycan, **Beta-1,3 glucan** and **Beta-1,6 glucans** combined with protein, as an active constituent to support the immune system.*

Maitake D-fraction® is a standardized form of the proteoglycan, specially developed to be optimal for oral administration.

This product contains 3,000 mg of standardized extract from Maitake mushroom (PD-Fraction®) in an alcohol free, vegetable glycerine base.
