

SUGGESTED USAGE: Chew 1 lozenge daily with food, or as directed by your healthcare practitioner.

HOW IT WORKS: Coenzyme Q₁₀, also called Ubiquinone, is present in almost all cells, where it is necessary for mitochondrial energy production.* The body's highest concentrations of Coenzyme Q₁₀ (CoQ₁₀) are found in the heart, where constant chemical energy availability is imperative. In addition to its positive impact on cardiac function through energy production, CoQ₁₀ also functions as a powerful fat soluble free radical scavenger for vascular structures, as well as for other tissues.*

CAUTIONS/INTERACTIONS: Coenzyme Q₁₀ may interact with anticoagulant and antihypertensive medications, as well as with chemotherapy agents. Statin medications have been shown to decrease CoQ₁₀ levels in the body and CoQ₁₀ supplementation may be useful when taking these drugs. Consult your healthcare professional if you are taking any of these medications.

Do not eat freshness packet. Keep in bottle.
