

Clinical-Strength[†] Alaskan Omega-3 EPA/DHA Essential Fatty Acids

Top quality fish oil starts with top quality fish. The Alaska pollock and North Pacific hake we use in Alaskan Omega-3 are caught in the clean, cold waters of the North Pacific, then immediately processed, right at sea. The oil is then molecularly distilled to concentrate the omega-3s and eliminate impurities, producing superior fish oil with the highest concentration of Omega-3s available today.

Our Alaska Pollock comes from a well-managed fishery that is certified sustainable. For more information please visit:
<http://sustainability.alaskaseafood.org/>

You can trust Alaskan Omega-3 Fish Oil to be:

- ✓ Made in the U.S.A.
- ✓ 100% Certified Sustainable
- ✓ [†]Contains at least 80% EPA+DHA or 85% total Omega-3s
- ✓ Easy to Swallow in a Mini Softgel

* Supportive, but not conclusive research shows that consumption of EPA and DHA Omega-3 Fatty Acids may reduce the risk of coronary heart disease.
