THE BENEFITS OF BCAA ADVANCE XR™

GNC's superior Pro Performance® XR Series™ BCAA Advance XR™ is uniquely formulated to help athletes receive immediate release of muscle-fueling Branched Chain Amino Acids (BCAA), plus a longer lasting supply of anabolic Leucine. Leucine is the key BCAA shown to impact muscle protein synthesis.* This anabolic building block is now Optimal Timing Technology – OT^{2™} – enhanced to provide a sustained release of Leucine for six hours.

OT^{2™} – THE EXCLUSIVE GNC ADVANTAGE

OT^{2™} is GNC's intelligent nutrient delivery system engineered to help release key ingredients during crucial times when you need them most! These breakthrough products are designed to deliver immediate and sustained release of ingredients to help maintain benefits throughout your workout, day or night. OT^{2™} ingredients are coated with a special technology that controls when they are released.

These special actives may be seen in the product – now that's real technology you can see and feel! It goes without stating that protein is critical for stimulating muscle synthesis and preserving muscle glycogen stores. Leucine, a key branched chain amino acid, is one of the primary nutrients in protein responsible for these benefits. With the introduction of the unique, sustained-release technology, now muscle-fueling leucine is released for up to six hours!
