S-ACETYL GLUTATHIONE

DIETARY SUPPLEMENT

100 mg • 60 Capsules

S-Acetyl Glutathione is a patent-pending, acetylated form of glutathione. This form is well-absorbed and more stable throughout the digestive tract than other forms on the market. Use of stomach acid-resistant capsules (DRcaps™) further protects stability. Laboratory data shows that S-acetyl glutathione supports intracellular glutathione and has a positive effect on many oxidative stress biomarkers, especially in the liver.*
