

Elixir of the Lake™ is a unique blue-green algae (*Aphanizomenon flos-aquae*) superfood that grows only in one place on earth – Upper Klamath Lake in Oregon. It is a nutritional powerhouse and a true superfood. Harvested at the peak of the life cycle of the algae's "bloom," Elixir of the Lake™ contains a vast array of unique and extremely beneficial nutrients, including chlorophyll, B vitamins, beta-carotene (non-toxic vitamin A), macro minerals, trace minerals, phycocyanin and phenylethylamine (PEA), and trace amounts of the omega-3 fatty acids DHA and EPA. Blue-green algae provides complete plant protein and is among the world's highest naturally-occurring sources of protein (50-60%). Supports immune system, brain, joint, nervous, and kidney function along with physical energy and a positive, focused mental state.*
