

For the last 5,000 years, Chinese herbalists have processed mushroom fruiting bodies via hot water extraction for tonic immune support. The fire-enhanced extraction process is essential in order to break down the tough, fibrous cell walls in mushrooms and thus render the beta-glucans (compounds which support the immune system) bioavailable. Fire-enhanced mushroom extracts are vastly superior to raw mushrooms. Some things are best raw, and some things need to be enhanced by fire. HealthForce knows the difference! MycoForce Immunity™ contains fire-enhanced extracts of wood-grown mushroom¹ fruiting bodies specifically chosen for their purity and immune supporting properties, combining the best of modern technology with indigenous extraction techniques to bring you maximum strength and purity. Each type of mushroom has a slightly different beta-glucan fraction profile, and by combining these different beta-glucan fractions, we produce a more complex and ultimately effective immune response for daily immune support.*

¹Technically, chaga is a sclerotia (mass of mycelium), though it is still commonly referred to as a mushroom.

"HYPE IS NOTHING. SUBSTANCE IS EVERYTHING!"
