Simply stated, BioGenic Stamina™ is the only formulation with all the necessary compounds to be considered a "true" Maximum Sexual Stimulant.

BioGenic™ contains the following sexual enhancers for a Maximum Sexual Response:

Yohimbe: Precursor to Nitric Oxide, key substance needed to augment blood flow to the genitals for stiffer, harder erections.

Xanthoparmelia Scabrosa: Natural source of the core molecules in medications for impotence. Helps to sustain longer erections.

Cnidium Monnieri: Natural source to further affect smooth muscle reaction and expand penile artery blood flow. This ingredient works via the Nitric Oxide pathway and cGMP.

Epimedium: Adaptogen which helps increase Nitric Oxide production which amplifies blood flow to the pelvic region resulting in firmer, stronger erections.

Maca: Used in South American medicine and known historically to boost libido, sexual stamina and energy.

Mucuna Pruriens: A natural phytochemical sometimes called Velvet Bean, it has been used to improve mental clarity. Research shows a powerful androgenic effect.

Polypodium Vulgare: A natural botanical that contains ecosteroids which research indicates can have androgenic effects and support for erectile sexual activity.

GABA: Natural compound that can increase the neurotransmitter dopamine. This compound naturally produces a healthy sense of ecstasy and well-being. This compound helps increase and release sensational orgasms.

L-Arginine: Activates the Nitric Oxide pathway and production of cGMP. Further enhances penile arterial blood flow leading to firmer, more rigid erections.
