Vegan D₃

Vitamin D aids in the absorption of calcium, helping to form and maintain strong bones.* This D₃ is made from lichen, a plant, a natural source of Vegan D₃.

Sunlight is needed for the body to naturally produce D₃. However, people who spend a lot of time indoors, or use sunblock, may not produce sufficient levels of this fundamental vitamin. Supplements are needed to help fulfill the daily requirements.

Vitamin D promotes bone and immune health.* The complementary benefits of Vitamin D₃ with calcium absorption is well known, but did you know that Vitamin D₃ also helps to support our immune system?*

Up until now, the source of Vitamin D₃ has been animal sourced, and not suitable for a vegan lifestyle or those who prefer a plant-based vitamin. Country Life now offers Vegan D₃ in a 100% plant-derived form.

To further complement your supplement regimen, try Country Life Target-Min's line of calcium and minerals. Available in a range of formulas, potencies, and sizes to best meet your needs.

At Country Life, integrity is our #1 ingredient. Every product is rigorously tested to ensure it measures up against Country Life's 5 Integrity Standards: 1) authenticity of ingredients; 2) cleanliness of ingredients; 3) freshness of ingredients; 4) consistency of the formula; and 5) accuracy of labeling.
