Posture-D[®]

CALCIUM

WITH VITAMIN D & MAGNESIUM

Why has Vitamin D been
increased to 500 IU per caplet?

Vitamin D is extremely important in helping your body absorb calcium. Recent studies have shown that Vitamin D has other important benefits such as maintaining breast, colon and cardiovascular health.* Many of us don't get enough sun exposure or eat foods sufficiently rich in Vitamin D, so now two caplets of Posture-D provides 1000 IU of Vitamin D.

Posture-D[®]

CALCIUM

WITH VITAMIN D & MAGNESIUM

600mg

contains
PHOSPHORUS
and now
4X MORE VITAMIN D

60 Caplets
Easier-to-Swallow
Dietary Supplement

Posture-D[®]

CALCIUM

WITH VITAMIN D & MAGNESIUM

Why is Phosphorus Important? According to recent studies, consuming calcium with phosphorus is more effective at building strong bones than consuming calcium alone.* If you are among the 50 MILLION American women who don't obtain the daily RDI for phosphorus from a balanced source in their normal diet...

Take **Posture-D**, the only leading calcium supplement that delivers the ratio of calcium to phosphorus found in healthy bones.*
