

GAMMA-OTM

FOR PROFESSIONAL ATHLETES

Gamma-O has been demonstrated to naturally **increase testosterone levels** and enhance the release of endorphins that **lower stress**. Used as part of a sound training program, the increase in testosterone and endorphins aids in the development of lean muscle tissue while **burning off excess fat** without the harmful side effects of steroids or andro products. Additionally, Gamma-O acts to interfere with the absorption of cholesterol into the body, helping to naturally maintain cholesterol levels already within the normal range. Gamma-O also possesses strong antioxidant properties which can protect heart vessels from free-radical damage.

Gamma Oryzanol is a rice bran extract, made from plant sterols and ferulic acid. Our proprietary process of turning the powder extract into a liquid emulsion enhances absorption. This is the most powerful form of Gamma Oryzanol that can be absorbed by the human body. Professional Athletes on Gamma-O experienced **increased strength**, **reduced excess body fat**, **enhanced energy** during workouts and **reduced post-workout soreness**.
