Vitamin D assists in the absorption of calcium. Regular exercise and a healthful diet with adequate calcium are essential in achieving peak bone mass in teenagers and young adults and maintaining bone health during adulthood. Individuals who do not store enough calcium throughout their lives have an increased risk for developing osteoporosis.

Suggested use: Take one caplet two times daily with a full glass of water, preferably with a meal.

Keep out of the reach of children.
Keep in a cool dry place, tightly closed.
Calcium with Vitamin D Tablets USP.
