

FULL CYCLE NITRIC OXIDE OPTIMIZATION

NO2 BLACK FULL CYCLE® drives NO optimization on four powerful fronts; feeding, fueling, protecting and generating muscle. Here is how it works: First, the L-Arginine precursor, L-Citrulline, effectively "feeds" more L-Arginine into the NO - production matrix. Second, premium sources of L-Arginine provide the "high-octane" base that fuels NO conversion. Third, L-Norvaline helps combat the Arginine-converting enzymes to help support greater reserves of NO fuel. Fourth, the NO generating NOS "factories" are upregulated on two fronts, yielding up to 1250% more nitric oxide.**

WARNING: Consult your healthcare professional prior to use if you have or suspect a medical condition, including high blood pressure and a history of cold sores, are taking prescription drugs, or have allergies to arginine or milk. Do not use if you are pregnant or lactating. Not intended for use by individuals under the age of 18 years. Do not exceed the recommended intake.
