

SUGGESTED USAGE: Take 1 capsule daily, or as directed by your healthcare practitioner.

HOW IT WORKS: For centuries, the Hawthorn plant has been used to promote healthy cardiovascular function and scientific research has provided evidence of its cardiac-supporting properties.* The Hawthorn shrub (leaf and flower) possesses polyphenols and flavonoids that help to neutralize free radicals due to everyday metabolic and environmental stress.* Vitexin, a well-known flavonoid constituent of Hawthorn has also been shown to support healthy blood flow and to support healthy heart muscle function.* Clinical studies have demonstrated that Hawthorn may help to maintain blood pressure that is already within the healthy range.*

CAUTIONS/INTERACTIONS: High doses of Hawthorn extract have been associated with vertigo and dizziness. Hawthorn may interact with blood pressure medications and heart medications. If you are taking any medications that affect cardiac function or blood pressure, if you have a known heart condition, or if you are pregnant/nursing, consult your healthcare practitioner before taking this product. Keep out of reach of children.
