

EDTA 300 EDTA Dipotassium Magnesium

A specially formulated dipotassium salt of EDTA magnesium chelate, containing 20% potassium and 6% magnesium by weight. A daily serving of 6 tablets supplies 1.8 g of EDTA complex, equivalent to 1.3 g of EDTA free acid.

Suggested Use

As a dietary supplement, 3 tablets with a glass of water two times daily, 30 minutes before breakfast and at bedtime, or as directed by a healthcare professional.

Caution: This product is recommended to be used under medical supervision in order to evaluate results. EDTA is known to deplete trace minerals, so repletion is suggested. The doctor may also wish to support kidney and liver function.

Keep out of reach of children. Store in a cool, dry place, tightly capped.
