Theracurmin® supports the body's healthy inflammatory response¹ with one of the most advanced forms of curcumin available, shown in research to provide faster dispersion and superior bioavailability. Curcumin is an important constituent of turmeric, the deep gold spice made from the rhizome of a plant in the ginger family. Theracurmin® was shown in one study to be 27 times more bioavailable than an equivalent amount of standard, pure curcumin, as measured by blood plasma concentration. Source Naturals **THERACURMIN®** has significantly increased bioavailability over standard curcumin because of micronized particles that are stabilized with gum ghatti for enhanced dispersion in the gut. Curcumin may support neuronal and cardiovascular health and helps protect cells from the damaging effects of free radicals.*

¹ Not all inflammation is associated with disease states. Inflammation is also the body's healthy immune response to life's normal stressors such as strenuous exercise or an occasional high-fat/high-calorie meal. The body's inflammation response to life's occasional, normal stressors is important for optimal health.
