

HypOxygen™ was designed to be utilized with hypoxic (low oxygen) training methods and provides specific nutrients needed to support the normal production of red blood cells.* High altitude training has been shown to enhance oxygen uptake and utilization capacity and increase the efficiency of cellular energy production.* Hypoxygen supports oxygen delivery to muscle tissue and accelerates the removal of metabolic waste byproducts such as lactic acid.* These oxygen delivery advantages may support athletic performance and recovery.*

Suggested Use: Take 2 capsules on exercise days. For use with hypoxic equipment and training schedules: Depending upon body weight and level of exercise, take 3-4 capsules on hypoxic training days, and 1-2 capsules on off days.

Warning: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of the reach of children. In case of accidental overdose, call a doctor or poison control center immediately. Consult a physician before use if you have been treated for or diagnosed with, or have a family history of, any medical condition(s).
