

exoFlex™

Eggshell Membrane • Liposomal Technology

What is exoFlex™

exoFlex™ is the world's first liquid liposomal encapsulated joint health supplement utilizing eggshell membrane!*

When it comes to choosing a natural joint health supplement, providing quick and efficient support can be more important than dosage size.*

exoFlex™ is a powerful formulation of synergistic nutrients and antioxidants encapsulated into all-natural lipospheres. These incredible nano-sized liposomes protect the exoFlex™ formula, helping to facilitate a more efficient transition through the enzymes of the body's digestive system as they make their way into the bloodstream.*

Major causes of joint discomfort can include the breakdown of cartilage due to strenuous athletic training, sports-related injury, and age-associated joint deterioration and inflammation.*

exoFlex™ works by providing Biova's proprietary eggshell membrane BiovaFlex™, coupled with key nutrients and antioxidants to aid in neutralizing and decreasing free radical damage.

exoFlex™ supports the body by helping to create the essential building blocks required to support essential joint and connective tissue health.*
