

**If you're serious about performance and results, you need the ALL-NEW MuscleTech® Performance Series!**

- NO Proprietary Blends
- NO Underdosed Key Ingredients
- NO Banned Substances
- NO Hype
- NO Exceptions
- NO Fillers

**Just the Most Powerful Formulas Available**

### MASS-TECH® – The Scientifically Superior Mass Gainer

New MASS-TECH® is an advanced muscle mass gainer designed for any individual who has a tough time adding size, is in their bulking phase or wants to break through their strength plateaus. Power-packed with 80g of protein and 1,000 mass-producing calories when mixed with 2 cups of skim milk, this potentially superior formula is also enhanced with a proven anabolic driver for rapid mass and strength gains!\*

#### •Better Quality Calories Designed for the Hardgainer

MASS-TECH® is a powerful and scientifically superior weight gainer designed to be taken twice daily. The new, powerful formula now delivers a massive, 1,000 calories (when mixed with 2 cups of skim milk) derived from high-quality protein and quickly digested carbohydrates.\*

#### •More Protein Per Serving Than Other Weight Gainers

New and improved formula features an 80g multi-phase protein system (when mixed with 2 cups of skim milk), which supplies fast- and slow-digesting proteins. The multi-phase protein system provides critical amino acids to the body at varying speeds.\*

#### •More BCAAs and L-Leucine Per Serving than Other Weight Gainers

The formula's protein dose supplies a massive 8g of L-leucine and 17g of BCAAs when mixed with 2 cups of skim milk, which helps fuel your skeletal muscles, preserve muscle glycogen stores and helps to reduce the amount of protein breakdown.\*

#### •Build More Strength

Unlike other leading gainers that contain little to no creatine, MASS-TECH® delivers a 10g clinically validated dose to increase strength fast.\*

#### •Helps Replenish Glycogen Stores

Supplies 156g of carbohydrates when mixed with 2 cups of skim milk through a multi-phase carb complex to both spike insulin, quickly shuttling creatine into the muscle, and promote muscle glycogen replenishment, helping to put the body into an anabolic state.\*
