

Renew skin's suppleness. Support healthy aging and help combat against environmental aggression. This prohydration maintenance complex helps boost skin's ability to do both.[‡]

Ceramides help lock in moisture at skin's surface and retain hydration. Depleted levels contribute to a dull, lifeless appearance. Ceramosides™ Ceramides support skin moisture-locking lipids that bump up hydration for skin that's softer and smoother. Some clinical support shows that this ingredient may help restore skin's vulnerable moisture barrier in as little as two weeks.[‡]
