

Medical-Grade Collagen: 102 Million Doses, 35 Years, 4,700 Doctors, Hospitals and Health Professionals...

AminoSculpt® is the original and only true Medical-Grade Collagen™ supplement. Collagen loss is a natural part of aging and can lead to thinner hair, wrinkles, stiffer joints, longer recovery times and a loss of muscle tone. AminoSculpt's high-dose, easily absorbable liquid collagen peptides help build, restore and repair your body's collagen, to help you look and feel younger.*

The Collagen Doctors Recommend to Doctors...

Unlike generic collagen powders and pills, AminoSculpt's unique liquid collagen peptides have been the subject of three double-blind, placebo-controlled clinical trials, which are published in reputable medical journals. These studies show that AminoSculpt's peptides work 5 times better than whey protein for repairing skin and accelerating recovery. They also show significant improvements in lean body mass (like skin, hair, nails, bones, connective tissue, and lean muscle).

Using our medical-grade CollaPure™ production process, we enzymatically hydrolyze (pre-digest) raw, certified grass-fed collagen into peptides so even the most sensitive individual can absorb them. It's just one of the many reasons why doctors trust AminoSculpt's collagen peptides more than any other collagen supplement.

High-Dose Liquid Type 1 Liquid Collagen Peptides Support:

- Improved recovery and tissue repair
- Body toning (increasing lean body mass and decreasing body fat)
- Fuller hair, smoother and firmer skin, and stronger nails
- Healthy joints, connective tissue, bones, and teeth
- Better sleep

DIRECTIONS: Take two Tablespoons (1 Fl Oz/30 mL) daily at any time.

For best taste mix with 2 Fl Oz of water. For optimal body toning and sleep benefits, take AminoSculpt on an empty stomach at bedtime. For best results, drink six to eight glasses of water daily. While most users start to notice benefits within 2 weeks, allow 90 days of use for maximum benefits.

NOTICE: AminoSculpt is made with natural ingredients, therefore the color, taste, and thickness will vary between batches.

CAUTION: KEEP OUT OF THE REACH OF CHILDREN. Do not use as a sole source of protein. As with all supplements, consult with your healthcare provider before using with infants, children, or if you are pregnant, or nursing.
