

Suggested Use: Take NutraBio Casein before bed and/or between meals when slow digesting protein is desired. Add 1 scoop with 8 ounces of cold water or your favorite beverage to a shaker cup or blender and mix for 25-30 seconds. Vary the amount of liquid to meet your desired taste and consistency. Drink 1-3 servings daily as needed to satisfy your protein requirements. Using nonfat milk instead of water will give you a thicker, creamier shake.

SUSTAINED RELEASE FOR PROLONGED AMINO ACID DELIVERY.

Micellar Casein has a slow absorption rate into the bloodstream, which provides a steady stream of amino acids to muscle cells lasting 4-6 hours. This ensures positive nitrogen retention in muscles for much longer periods compared to whey protein. Casein is best taken at night or in combination with whey protein isolate after workouts to help provide sustained amino acid delivery during the two most crucial times of muscle growth: during sleep and post-training.
