Keep out of reach of children.

No. 19 N'er G is a unique formulation consisting of Chlorophyll, Calcium Ascorbate, Whole Aloe Vera Leaf and Wachters' Exclusive Blend of Sea Vegetation®. Our blend has been specifically created using up to 15 different species of sea vegetation from around the world. Our species are selected for their rich nutritional profile of naturally occurring vitamins, minerals, trace minerals, amino acids as well as purity and quality. If they do not pass our quality tests they do not make it into Wachters' Exclusive Blend, putting it in a class by itself. It is this incredible quality blend that makes our Chlorophyll superior to anyone else's on the market serving as the synergistic activator of the Chlorophyll, enhancing its effectiveness. Chlorophyll is a green pigment that is the life force of plants and one of the purest forms of natural food. It contains Magnesium an essential mineral for optimum body cell function and health. Chlorophyll can act as a blood cleanser, its molecular structure is chemically similar to human blood with the exception that human blood has iron as its central atom and chlorophyll has magnesium. Aloe Vera can be soothing to the stomach, kidneys and liver and may promote energy. Vitamin C is needed for adrenal gland function and may enhance the immune system. The Calcium Ascorbate form of Vitamin C enters the bloodstream and tissues faster than regular Vitamin C. The Wachters' Exclusive Blend of Sea Vegetation® is the key ingredient that makes this formula unique.*
