RAPID PERFORMANCE & RECOVERY
SUPERCARB

Performance endurance requires fuel and Carbs = FUEL! Carbohydrates fuel the body's glycolytic and anaerobic ATP-PC energy systems releasing true athletic power. However, not all carbohydrates are created equal! For optimal performance and to avoid cramping experienced with inferior carb consumption there must be a balance between how much you take in and how fast it leaves your stomach (gastric clearance rate). Gaspari researchers utilize the proprietary Osm Technology™ to finely tune Glycofuse® to deliver a solution with low osmolality, which means a faster gastric clearance!

Glycofuse® uses only CLUSTER DEXTRIN™, ideal for athletes looking for a clinically studied carbohydrate with a proven track record for increasing high performance power, glycogen loading, and optimizing endurance levels. Do you need fuel for your workouts and rapid replenishment for the next training session? Do you want sustained energy and balanced glucose levels which won't inhibit fat burning? If you want all that, then you need Glycofuse®!

DIRECTIONS AND USE:

As a dietary supplement mix **1 level scoop** (28g) of GLYCOFUSE® with **12-16 fluid oz.** of water. GLYCOFUSE® can be consumed before training, while training, and post work-out to take your performance to the highest level.

Supplement Facts

Serving Size 1 Scoop (28g)
Servings Per Container 60

	Amount Per Serving	%DV*
Calories	100	
Total Carbohydrate	25g	8%
Calcium (as Calci-K® calcium potassium phosphate-citrate)	83mg	8%
Magnesium (as Albion® dimagnesium malate)	23mg	6%
Sodium (as sodium chloride)	35mg	2%
Highly Branched Cyclic Dextrin (as Cluster Dextrin®)	25g	**

*Percent Daily Values are based on a 2,000 calorie diet.
**Daily Value not established.

OTHER INGREDIENTS: Citric Acid, Malic Acid, Natural Flavor, Sucralose, Acesulfame Potassium, Turmeric Powder (color).

ALLERGENS: Contains none

DO NOT USE AS A SOLE SOURCE OF NUTRITION FOR WEIGHT LOSS OR MAINTENANCE. KEEP OUT OF REACH OF CHILDREN. STORE IN A COOL, DRY PLACE.
