Made in Canada by Institut Rosell-Lallemand, Inc. for Jarrow FORMULAS® Superior Nutrition and Formulation™ P.O. Box 35994 Los Angeles, CA 90035-4317 www.Jarrow.com

†† #1 in both Dollar Sales and Unit Volume in the Natural Channel, according to SPINS, a market research and consulting firm for the Natural Product Industry (SPINScan Natural, 52 Weeks Ending 1/22/11). Jarrow Formulas® puts the "PRO" in probiotics™

USAGE: Take 1 capsule up to 4 times per day, preferably on an empty stomach, though they may also be taken with food or as directed by your qualified health care consultant.

Storage Instructions: Jarro-Dophilus EPS® is room temperature stable and does not require refrigeration. Refrigerating Jarro-Dophilus EPS® is optional and will further extend the shelf-life by safeguarding the product from heat, especially during the hot summer months. Blister packaging each capsule provides extra protection to the probiotic bacteria against external moisture and oxygen.

Jarro-Dophilus EPS® is a Stable-Dophilus® due to its stability at room temperature and enteric coating, which protects the probiotic bacteria from stomach acid. Eight (8) different strains of probiotic bacteria are delivered directly into the small intestines where probiotic bacteria fully exert their beneficial effects.* Probiotic bacteria in Jarro-Dophilus EPS® are selected from the following 4 genera:

Lactobacillus, *Bifidobacteria*, *Lactococcus* and *Pediococcus*.

Strains in Jarro-Dophilus EPS® promote healthy intestinal microflora, which in turn helps to support intestinal health and immune function.* *Bifidobacteria longum* BB536 has been clinically shown to stimulate immune response and promote healthy intestinal microfloral balance.* *L. rhamnosus* R0011 is a unique, high producer of polysaccharides that facilitate colonization and stimulate intestinal immune response.* *L. helveticus* R0052 assists in breaking down lactose (milk sugar), which may improve digestion of dairy products by those individuals who are lactose intolerant.* *Lactococcus* and *Pediococcus* help reduce spoilage caused by unfriendly bacteria in fermented foods.*

Keep out of the reach of children.
