Halodrol™ is the latest evolution of the legendary Halodrol-50™, made famous by Gaspari Nutrition over a decade ago. Gaspari Nutrition commissioned the brightest scientific minds to develop a worthy successor to this widely popular product. The goal was to develop an even more potent and effective formula that would be worthy of sporting the Halodrol namesake.

Gaspari is proud to introduce the new Halodrol™, a patented, cutting-edge legal anabolic agent that is undeniably the most scientifically advanced and potent product in its class.

Halodrol™ derives its powerful anabolic effects primarily from patented naturally occurring DHEA derivatives. These compounds provide the body with intense myotropic growth via enhancement of key bodily processes shown to upregulate Androgen Receptor activation, protein synthesis, and net nitrogen retention. Halodrol™ provides these potent muscle building compounds at the precise levels shown to maximize size, strength, & power output, giving you everything needed to take your gains to entirely new heights. To ensure Halodrol™ provides you with the results you demand, each tablet is infused with a dual-phase delivery system, systematically designed to allow the active components to bypass stomach & liver degradation, allowing for never-before-seen bioavailability and absorption. This novel delivery system is what makes Halodrol™ capable of providing you with significantly higher blood hormone levels, resulting in unparalleled gains when compared to absolutely anything else available on the market.
