

PRECISION PROTEIN™

100% HYDROLYZED
WHEY PROTEIN WITH EET™

Gaspari Nutrition® is proud to announce a new breakthrough in whey protein performance. The revolutionary new **Precision Protein™** utilizes a proprietary process known as **Embedded Enzyme Technology™ (EET™)**. This new technology functions within a phospholipid matrix that releases Leucine and other amino acids early in the muscle synthesis process. In Phase 1 of the hydrolysis, the water activity is limited so the enzyme action is suspended. When water is added to the protein, Phase 2 begins by rapidly releasing more Leucine peptides increasing the body's ability to absorb amino acids. While other methods randomly hydrolyze the protein, **EET™** is engineered to selectively release Leucine peptides producing an increase in muscle synthesis and growth.†

What makes **Precision Protein™** better and more effective from other types of whey? **Embedded Enzyme Technology™** enhances the disbursement and assimilation of Leucine, transforming **Precision Protein™** into an anabolic muscle-building powerhouse. Studies both en vivo and en vitro have shown that increasing Leucine can stimulate muscle protein synthesis, inhibit protein degradation in skeletal muscle and in the liver as well. It is concluded that the role of Leucine is to provide a signal that amino acids are available, which in combination with the signal of energy availability from insulin, stimulates muscle protein synthesis. In other words, **EET™** greatly enhances the ability of **Precision Protein™** to offer increased muscle growth that other types of whey can't provide.†

Gaspari's Precision Protein™ with EET™ is the new gold standard in Whey Protein by providing unmatched bioavailability and unparalleled results. If you are looking for the purest and most effective muscle building whey protein, your search is finally over.†

INGREDIENTS: Hydrolyzed Whey Protein Phospholipid Matrix, Natural and Artificial Flavors, Cellulose Gum, Salt, Sucralose, Maltodextrin, Acesulfame-potassium, FD&C Blue #1, FD&C Red #40.

ALLERGEN INFORMATION: Contains Milk And Soy (Lecithin) Ingredients.

SUGGESTED USE: Mix 1 serving (1 rounded scoop) with 4-8oz (120ml-240ml) of water, milk, or juice in a shaker cup and shake well. For best results mix and drink immediately before and after your workout or whenever you need a powerful dose of protein and anabolic Leucine peptides. For maximum results, take 2-3 servings daily.

HOW TO USE

SHAKE

Add one scoop of Precision Protein™ + 4 - 8oz (120-240ml) of liquid to a shaker cup, secure the top and shake for 10-20 seconds.

STIR

Add one scoop of Precision Protein™ + 4 - 8oz (120-240ml) of liquid and stir for 20 - 30 seconds or until powder is completely dissolved.

BLEND

Add one scoop of Precision Protein™ + 4 - 8oz (120-240ml) of liquid to a blender and mix. Add 1 - 2 ice cubes for a frosty shake.

WHO

50g PROTEIN

25g PROTEIN

WHEN TO TAKE

PRE

Before training, Precision Protein™ is a great tasting drink that enhances absorption and uptake of BCAAs and EAAs.

POST

After a workout, Precision Protein™ enhances protein synthesis which decreases overall recovery time.

ANYTIME

Use low carb and low calorie Precision Protein™ between meals, with meals, or anytime as a healthy snack to keep you satisfied.
