Novedex XT™ is the single most potent non-androgenic PCT (post cycle therapy)/Testosterone booster available today. It was created to be more potent, based on binding times and binding ability (how fast and tight it "sticks" to the target molecule), than other PCT and Estrogen blockers.[†]

Novedex XT™ protects the smarter athlete against the effects of estrogen and the prevention of estrogen activity. With its unprecedented ingredient profile, this product could be the most effective natural way to trigger a potent and sustained physiological response to gain lean mass, strength, and endurance while helping to achieve a dry and ripped physique.[†]

Novedex XT™ can help minimize the production of estrogens in the body through its dual systems. This positively effects HPTA, which can allow your body to greatly increase testosterone production on its own.[†]

Gaspari Nutrition's® Novedex XT™ is designed to naturally cause a positive anabolic effect to gain muscle mass, strength, and endurance while helping to get lean. Additionally, if you are using or have recently used a prohormone, **Novedex XT's™** HPTA up-regulating effects can help your body restore and normalize natural testosterone production in your body. **Novedex XT™** is the perfect legal choice for post-cycle therapy.[†]
