Yerba Prima

Why Yerba Super Turmeric?

Many turmeric products are concentrated to contain just one constituent: curcumin. But turmeric's activity is due to a whole range of constituents, not just curcumin. Plus, most curcumin extracts are extremely difficult to absorb.

Yerba Super Turmeric features the world's most bioavailable *full spectrum* turmeric extract. Developed by two doctors, it combines a fat-soluble extract with a water-soluble extract, so it delivers *all* the beneficial components of turmeric.

- Full spectrum for maximum benefits
- Rapid absorption for immediate relief
- 24-hour activity for round-the-clock support
