

For Strong *plus* Flexible Bones†

How Healthy Bones Plus™ Works

Increases Bone Collagen Formation*

*ch-OSA® (6 drops/d); Calcium (1000mg/d); Vitamin D (800 IU/d)

Clinical Trial Results: Statistically Significant

Improves BMD at Hip†

*ch-OSA® (6 drops/d); Calcium (1000mg/d); Vitamin D (800 IU/d)

Increases Calcium "Binding Sites"†

Bone collagen provides the "binding sites" for calcium. All calcium must "bind to" collagen in order to become part of bone. Age-related collagen loss leads to diminished calcium content and reduced bone mineral density. Healthy Bones Plus™ is clinically proven to generate bone collagen and increase bone mineral density at the critical hip region.†

Promotes Vital Bone Flexibility†

Collagen gives your bones flexibility and their ability to withstand physical stress, as from impact. Healthy Bones Plus™ is clinically proven to increase bone collagen formation.†

Increases the Total Strength of Bone†

Increasing your bones' total strength requires both "hardness," determined by the calcium content of your bones and "toughness" (flexibility), determined by collagen. New Healthy Bones Plus™ promotes both types of bone strength.†

Provides Premium High-Absorbing Calcium*

Supplies your bones with a rich source of premium high-absorbing calcium and vitamin D. Key transporters ensure delivery from bloodstream to bone.†
