

Amino acids are the building blocks of protein, which makes up muscle tissue. **MRI Amino Ten™** is a sophisticated amino acid intra-workout formula that helps maximize lean muscle protein synthesis and promote recovery.*

Using this optimal, leucine rich combination of 10 essential amino acids with a 4:1:1 BCAA ratio allows you to get the most out of your workouts. In fact, the same amino acid blend was clinically tested by NASA to preserve muscle function and strength while on deep space missions.*

*Drinking BCAAs alone have little effect on muscle protein synthesis due to the lack of essential amino acids. Study shows that 6.7g of essential amino acids, as found in **Amino Ten™**, builds more muscle than 15g of whey protein*.

Delays the onset of muscle soreness allowing you to train harder, longer*.

Reduces muscle breakdown during recovery so you can keep those hard-earned muscles.*

Amino Ten™ is also low in carbs and uses no artificial colors. Take **Amino Ten™** during your workout to initiate protein synthesis so you can build lean muscles.*
