

The ketogenic diet is a low-carb, high-fat diet which is designed to put your body in a metabolic state called, ketosis. When your body undergoes ketosis, it shifts your preferred source of fuel from carbohydrates to fat - making your body a fat-burning machine. **MRI Keto** is the cutting-edge, most convenient approach to initiating and sustaining a ketogenic diet.*

Caprylic Acid is an ultra-purified medium chain triglyceride (MCT), a type of fat derived from coconut oil that helps initiate ketosis by being quickly absorbed into the body and converting fat into energy.†

Omega 3s are essential fatty acids which provide mental support.†

Caffeine provides a boost of energy which triggers the body to burn more calories. It also helps support concentration, alertness, mood, and brain function.†

Vitamins C, D and K work together to help boost your immune system, promote muscle protein synthesis and help build lean muscle mass.†

*To kick start your ketogenic diet and burn fat faster, take 4 **Keto** softgels in the morning with your daily breakfast.†
