

DON'T FIGHT IT, FUEL IT.

Is your body telling you it needs more fuel? Give it what it craves. XCT[®] oil is a flavorless oil that transforms any salad, smoothie or snack into a delicious, energy-rich performance fuel, more lasting than any refined sugar or carb. Use it on anything.

WHAT IS XCT OIL?

XCT oil is not your average MCT oil. It's made exclusively from the two most easily metabolized fats in coconut oil, with zero lauric acid, which is harder to process and can slow you down. The result: high-performance fats your body can turn into energy faster, so you feel great.*

Love it or your money back.

DIRECTIONS

Try one teaspoon at a time first and then build up over several days to a full 1-tablespoon serving, as often as you'd like. Just start small—too much too soon can upset your stomach.

For low temperature cooking only.
Do not heat above 320°F.
